PROFESSIONAL SUMMARY

Cybersecurity and full-stack developer with a BCA degree, seeking to contribute to web application security and secure software development. Built WebShield, an analyst-assisted security assessment platform, and PrivacyGuard, a local network monitoring app with automated reporting — demonstrating the ability to independently design, build, and ship end-to-end security tools. Strong communicator and collaborative team player with a track record of ownership on cross-functional projects.

SKILLS

Security: Web Application Security, OWASP Top 10, Vulnerability Assessment, Authentication and Authorization Testing, JWT Analysis, Access Control Testing, Rate Limit Testing, Security Reporting, Threat Monitoring

Programming Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks and Tools: FastAPI, React, Vite, httpx, Docker, Kali Linux, Burp Suite, Splunk, SQLite, PyInstaller, Inno Setup, GitHub Actions, Git, GitHub, AWS Basics

Soft Skills: Communication, Team Collaboration, Problem Solving, Attention to Detail, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

MERN Stack Development Intern, Zidio Development | 3 Months

- Collaborated with the development team to design and build scalable MERN stack apps, owning responsive React.js UI from planning through implementation.
- Integrated multiple RESTful APIs and managed MongoDB operations, coordinating with the team on debugging, testing, and deployment for real-world projects.
- Applied Git-based version control in a collaborative workflow, contributing to code reviews and clear documentation.

CYBERSECURITY PROJECTS

WebShield - Web Application Security Assessment Platform | React, Vite, FastAPI, httpx

- Independently designed and built an analyst-assisted security assessment platform, combining a React/Vite dashboard with a custom FastAPI testing engine for authorized penetration testing.
- Owned end-to-end implementation of HTTP, authentication, JWT, rate-limit, and access-control checks, including the analyst confirm/dismiss workflow, evidence management, risk classification, and automated reporting.

PrivacyGuard - Cybersecurity Monitoring Application | React, FastAPI, Python, SQLite, PyInstaller, GitHub Actions

- Independently developed a local network monitoring app covering device discovery, service exposure analysis, trusted-device detection, breach checks, SQLite history, and PDF reporting.
- Took full ownership of packaging the app as a Windows desktop product using PyInstaller and Inno Setup, and configured GitHub Actions to automate the build/release pipeline.

OWASP Juice Shop Security Testing | Burp Suite, Kali Linux, OWASP Top 10

- Identified and validated broken access control, missing HttpOnly cookie protection, session tokens remaining valid after logout, and negative product quantity acceptance vulnerabilities.
- Documented evidence, severity ratings, business impact, and remediation recommendations for each finding.

EDUCATION

Bachelor of Computer Application (BCA), NMKRV College, Bengaluru, India — CGPA: 8.2

Pre-University Course (PUC), NMKRV PU College, Bengaluru, India — 82%

Cybersecurity Course, Web Application Security Testing, Texial — Completed

ACHIEVEMENTS

- Won 2nd Place at the Dayananda Sagar Academy of Technology and Management Hackathon for Signify, a Two-Way Sign Language Communication System.
- Participated in the Karnataka Traffic Police Civic Technology Challenge, developing technology solutions for real-world traffic management problems.

LICENSES AND CERTIFICATIONS

- Cisco Cyber Security
- AWS Cloud and DevOps Workshop - NMKRV College and Cloud Institution
- Cloud Infrastructure Workshop - Motorola Solutions and AISECT
- Dev Minds Advanced Java and Basics of Web Development - 42 Hours
